As a new Beijo Fashion Consultant, your first calendar month (in regard to the Momentum program) includes the month you submitted your agreement (called the buffer month) and the full calendar month after that. This allows the new consultant to receive their At A Glance kit and prepare for a full month of activity.

For example, if a consultant submitted their agreement on August 14, their Month 1 would include any PQV from August and September. The total # of parties and Personal Qualifying Volume from both August and September would count in this incentive program.

Personal Qualifying Volume includes personal inventory purchases, party orders, individual orders, and replicated website orders. You can find your up-to-date PQV for the month in your back office under My Earnings/Monthly Qualifications/Personal Qualifying Volume (PQV). In most instances, this is calculated at 70% of SRP.

In order to submit your 4 parties, you will need to Open a Show for each party. There is a tutorial in your back office (It's Show Time) that will walk you through this process.
